Day Completed

Examine each family member's hair for lice every day for 14 days or as long as lice/mis persist. Purchase an over-the-counter lice shampoo or cream rinse for all persons infested. Contact your doctor if your child has any open cuts or scratches on the scalp. Treat each infested person with the shampoo. Carefully follow label directions (some shampoos are to be used on dry hair). Clean combs and brushes with the prescription shampoo (soak for 1 hr) or place in hot water (150») for 5-10 mins. (Note: some plastics cannot withstand high temperatures.) Wash all clothing, towels, and bed linens of infested persons in hot water and detergent. Dry at hottest emperature for 20 mins. Allow enough time between wash loads to maintain hot water temperatures. Do this every day as long a lice/nits persist. Vacuum mattresses or run a hot iron over them. Place non-washables (hais, coats, sweaters, blankets, pillows, stuffed animals, etc.) in the dryer on high for 30 mins or in sealed plastic bags for 14 days. (Dry cleaning items is also effective.) Vacuum all upholstered furniture, rugs, and car seats. Do this every day as long a lice/nits persist. NSTRUCT YOUR CHILD NOT TO SHARE COMBS, BRUSHES, HATS, SPORTS HEADGEAR, OR EARPHONES WITH OTHERS. Report all cases of fice in your family to the school nurse. Notify all people who have recently been in contact with the infested person(s) daily for the next two weeks for sings of re-infestation and continue to remove mits as directed above.
